ISO-Aligned Best Practices For Secure, Reliable Offshore Partnerships

By aligning with ISO 27001 principles, enforcing strict IT practices internally, and maintaining transparent controls, Atticus provides a trusted environment for your offshore teams to thrive

- ✓ Your tools and data are protected from unauthorized access.
- ✓ Your consultants work on secure devices that reduce risk of breaches or data loss.
- ✓ Your company's information stays in the right place, and disappears when it should.
- ✓ Your brand and communications are protected from impersonation and fraud.
- ✓ Your team members start securely and leave securely — every time.
- ✓ Issues are resolved before they impact your operations.
- ✓ Your consultants work within a safe, standardized, and compliant tech environment.
- ✓ Your data stays safe — even in the event of unexpected outages.

BULLETPROOF ACCESS & SECURITY

Strict Data Access

- Role-based permissions - only authorized personnel see your data
- Mandatory NDAs + monthly security training for every employee
- Two-factor authentication + network firewalls + intrusion detection

Smart Data Practices

- Data collection limited to onboarding, support, and project delivery ONLY
- Clear retention periods
- Complete data cleanup when projects end
